

MegaSkills for Early Childhood Road to Reading

**Available for Back to School 2005
Tell Colleagues About This New Initiative!**

Children used to have to wait until “regular” school to get MegaSkills activities. No more!

Today, preschools and day care centers can get their own headstart by providing MegaSkills activities for their young children and their parents.

The activities are presented in format suitable for immediate reproduction. Five activities for each MegaSkill are produced on 8” by 11” sheets. There is a total of 55 activities.

A motivating game is built within the easy to do activities. Children get to check off the activities they do. Parents send in the child’s name to www.MegaSkills.org for praise and recognition.

Parents appreciate this program and appreciate your work more because of it. And children reap MegaSkills benefits at the age when MegaSkills can make enormous differences for their academics, character and social skills, now and later.
